

1. $F_{Ax} = F$, $F_{Ay} = \frac{F}{2}$

$$v_1 = wL$$

$$v_2 = w \cdot L \cdot \sqrt{\left(\frac{3}{2}\right)^2 + \left(\frac{\sqrt{3}}{2}\right)^2}$$

$$= w \cdot L \cdot \sqrt{3}$$

$$\phi_{tot} = wL F + wL \cdot \sqrt{3} \cdot \frac{\sqrt{3}}{2} F + wL \sqrt{3} \cdot F_{BC} = 0$$

$$F_{BC} = - \frac{5}{2} F$$
